

Extreme Performance with Sun Oracle DB Machine

ORACLE®

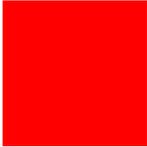

Ricardo Martínez
General Business Director, Oracle Iberia
Braga, May 26th 2010

Sun Oracle Database Machine / Exadata

The Extreme ROI Platform

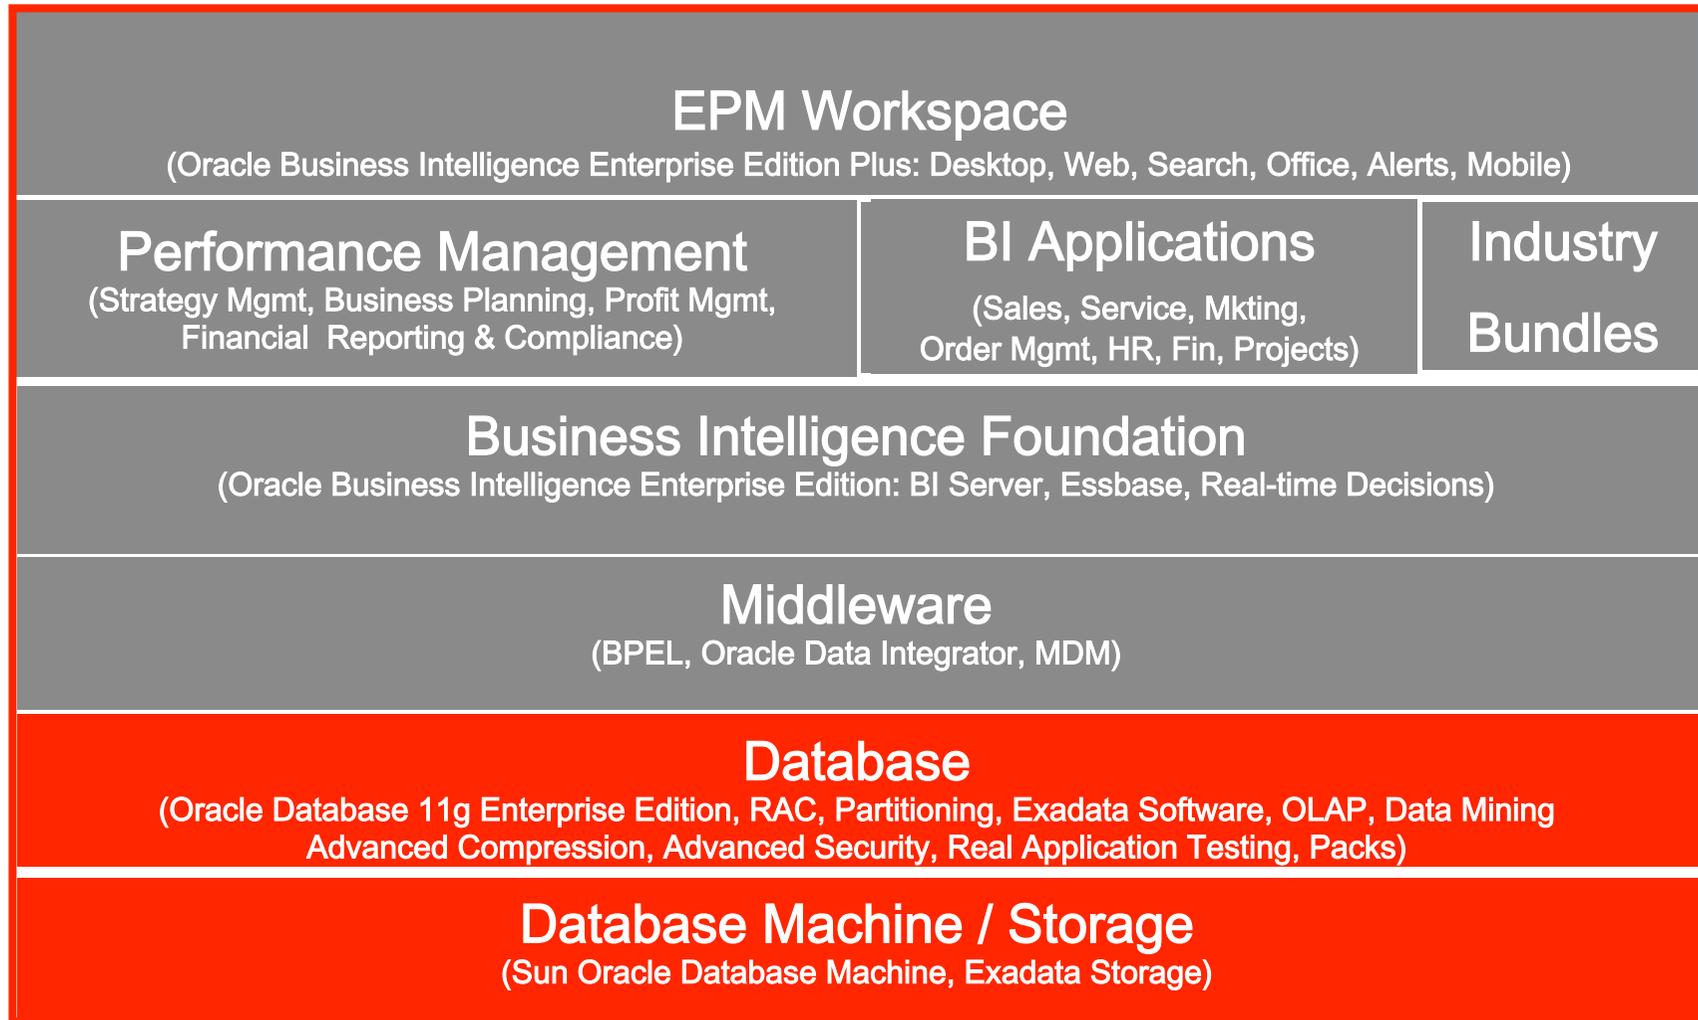

- Fast Predictable Performance
- Lower Ongoing Costs
- The Fastest Time to Value & Lowest Risk

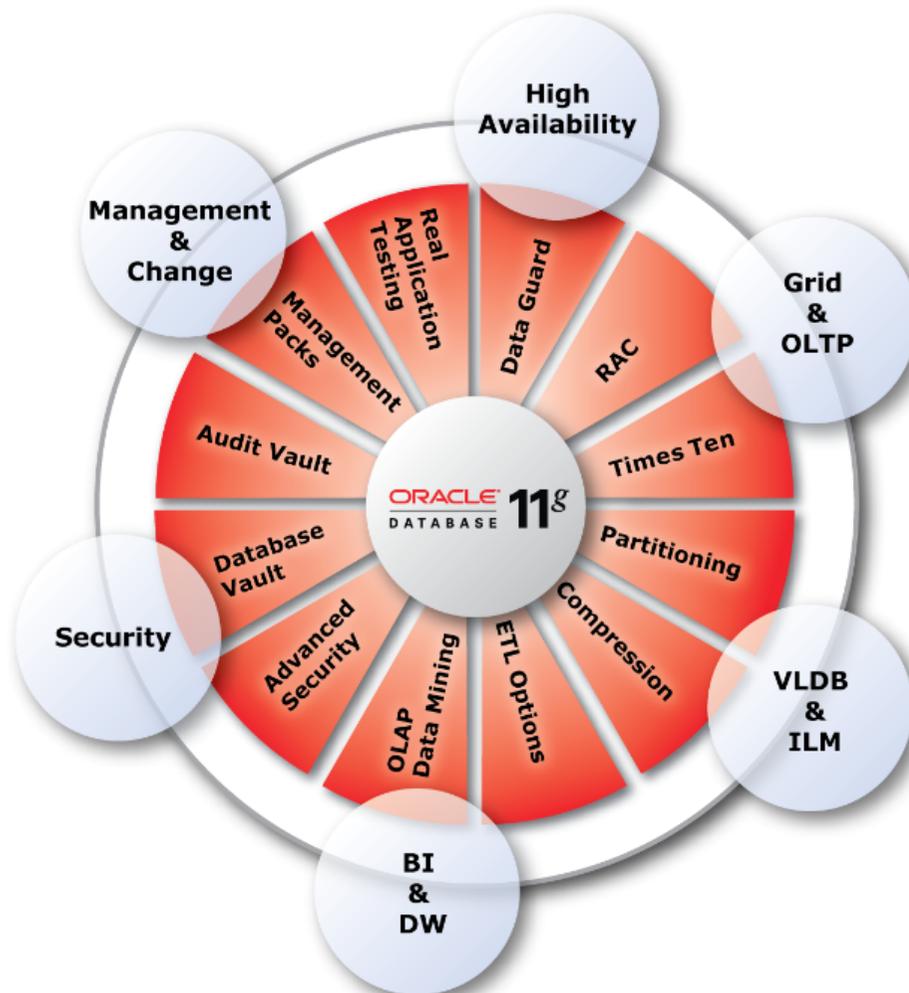

Oracle Data Warehouse components

Complete, Open, Integrated, Best-of-Breed

Oracle Database 11g

The Leading Database for Data Warehousing

- **Key Data Warehousing Capabilities**
 - Embedded Analytics
 - Single Point of Management
 - Secure
 - 24X7 Availability
 - Optimal Storage Management
 - Scale to hundreds of Terabytes & large analyst communities
 - Flexible Model Deployment

Sun Oracle Database Machine

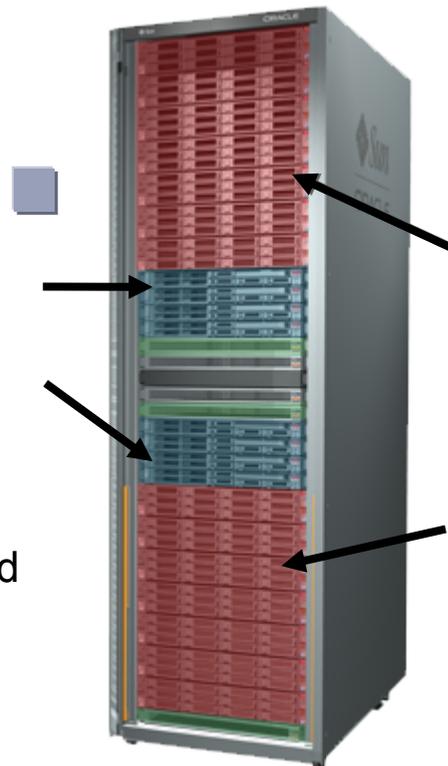

Highest performance, lowest cost, redundant, incrementally scalable

RAC Database Server Grid

- 8 High-performance low-cost computer servers
- 2 Intel quad-core Xeons each

InfiniBand Network

- 40 Gb/sec fault-tolerant unified server and storage network

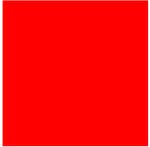

Exadata Storage Server Grid

- 14 High-performance low-cost storage servers
- 100 TB raw SAS disk storage
or
336 TB raw SATA disk storage
- 5TB flash storage!

ORACLE

1st and only complete grid architecture for all data management needs

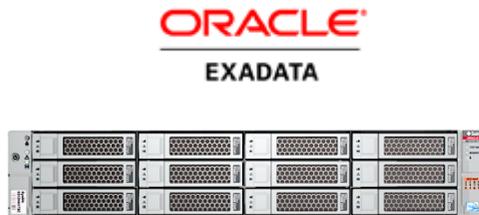

IT Challenges

CHALLENGES	ORACLE STRATEGY
<ul style="list-style-type: none">• Fragmented Solutions	<ul style="list-style-type: none">• Information Consolidation

<ul style="list-style-type: none">• Time to ROI / Development Time	<ul style="list-style-type: none">• Horizontal and industry pre-built solutions, appliance-like solutions
<ul style="list-style-type: none">• Rapidly Growing Data & User Communities	<ul style="list-style-type: none">• Enterprise class solutions serving 1000s of users and providing 100s TB of data
<ul style="list-style-type: none">• Deployment Manageability, Security & Expense	<ul style="list-style-type: none">• Integrated solutions that are centrally managed with advanced security / governance

The Products

Exadata Storage Server & Database Machine

- Exadata Storage Server
 - Storage optimized for Oracle DDBB
 - Extreme I/O and SQL Processing performance
 - Combination of HW & SW
- Exadata Storage Server Software
- Sun Oracle Database Machine
 - Pre-Configured for High Performance
 - Balanced Configuration
 - Pre-Tested Configuration
- Exadata Storage Server Software
- Oracle Database 11gR2

Sun Oracle Database Machine

Extreme Performance!

Oracle DB Server Grid

- Millions of transactions / second
- Tens of millions of queries / minute
- Billions of rows / minute

InfiniBand Network

- 880 Gb/sec aggregate throughput

Exadata Storage Server Grid

- 21 GBs disk bandwidth
- 50 GBs flash memory bandwidth
- 1 million I/Os per second

Deployments drastically simplified

Months to
days

- Database Machine eliminates the complexity of deployment
 - Months of Configuration, troubleshooting, tuning
- Database Machine ready from day one
 - Pre-built, Tested, Standard, Supported Configuration
 - **Executes applications without any changes**
- Extreme Performance *out of the box*

Start Small and Grow

1/4 Rack

1/2 Rack

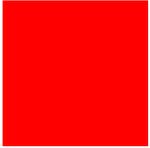

1 Rack

The Architecture of the Future

Massively Parallel Grid

The Best for DW
The Best for OLTP
The Best for Consolidation

THE BEST FOR DW

The Best Machine for Data Warehouse

OLAP

ETL

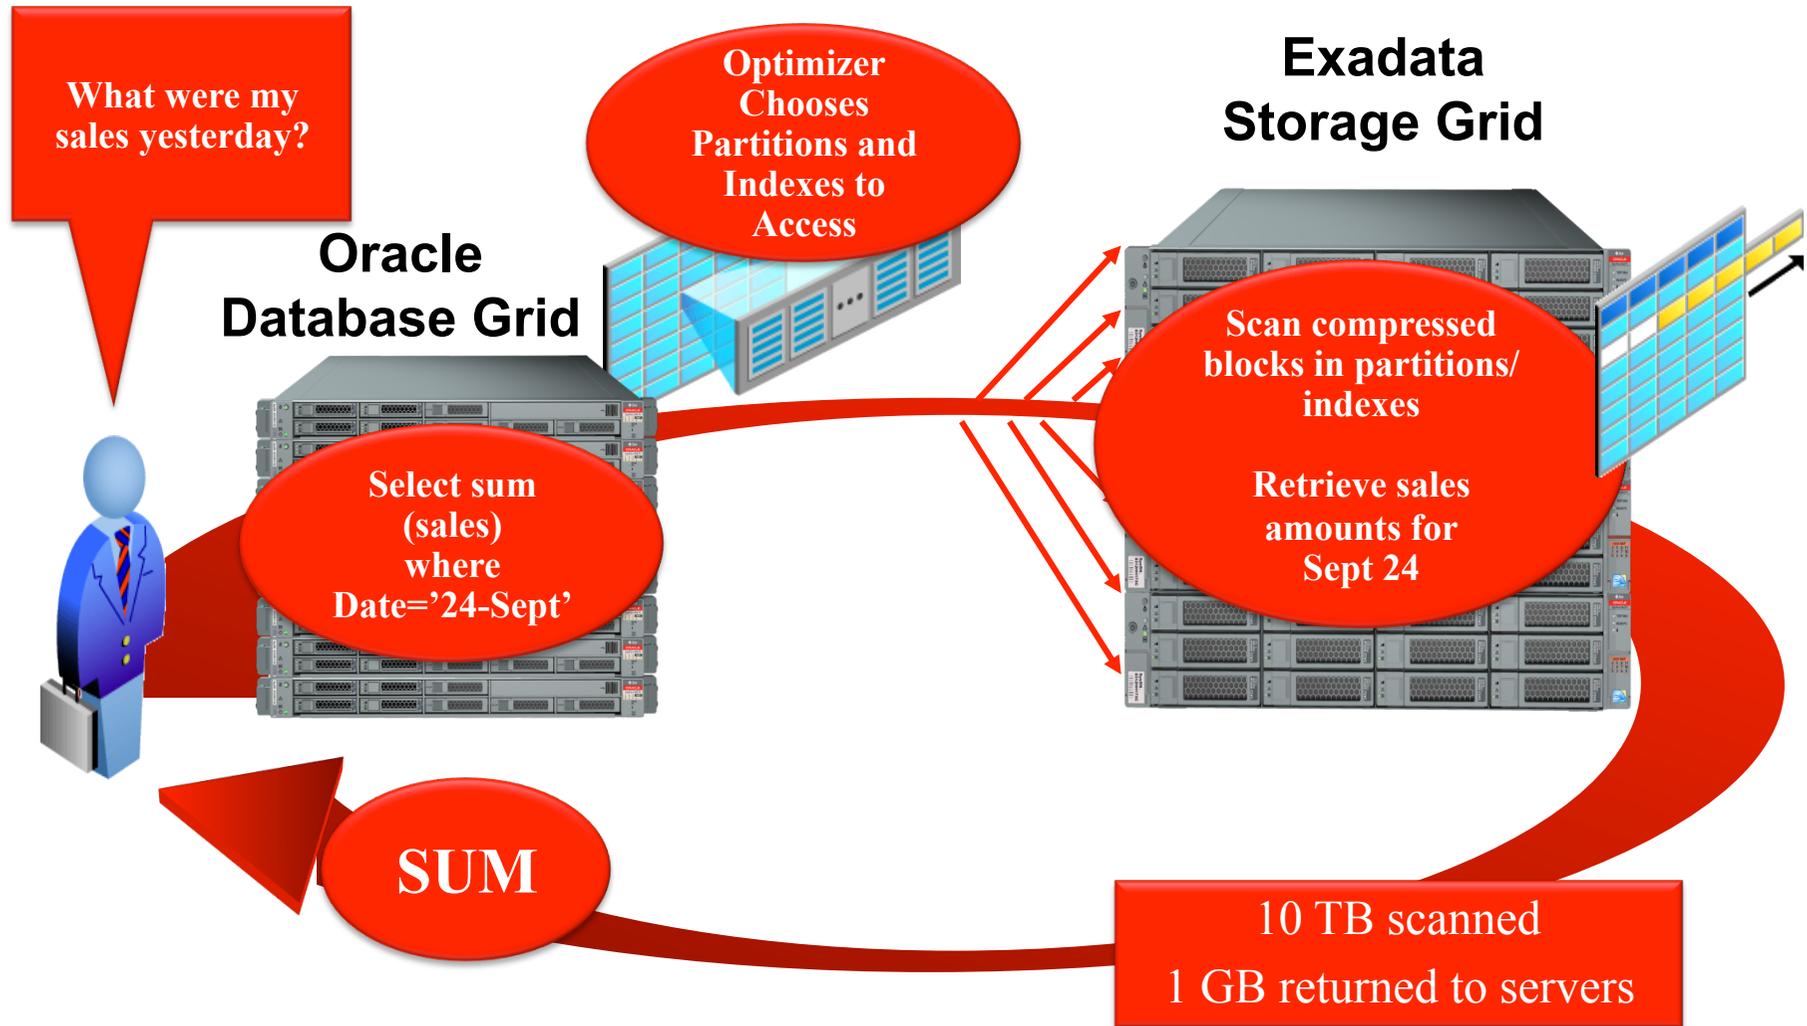

Data Mining

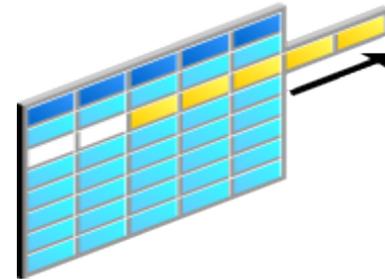

- Massively Parallel Hardware
 - Processes great quantities of data
 - Exadata processes data at the storage system
- More Complete Analytical Capacity
 - OLAP, Statistics, Spatial, Data Mining, Real-time transactional ETL, Efficient point queries
- Specific Optimizations for DW
 - Flexible Partitioning, Bitmap Indexing, Join indexing, Materialized Views, Result Cache
- **New Capacities for DW**

Exadata Storage Smart Scan

Exadata Database Processing in Storage

- Exadata cells process data in an intelligent manner
 - *Row filtering with “where” clause*
 - *Column filtering*
 - *Join filtering*
 - *Incremental backup filtering*
 - *Storage Indexing*
 - *Scans on encrypted data*
 - *Data Mining model scoring*
- 10x less data sent to the DDBB servers
- Transparent

Exadata Storage Index

Transparent I/O Elimination with No Overhead

Tabla

Idx

A	B	C	D
	1		
	3		
	5		
	5		
	8		
	3		

Min B=1
Max B=5

Min B=3
Max B=8

- Keeps in memory range of values
 - Stores the MIN and MAX of columns
 - Normally one entry in the index / MB of disk
- Automatic and transparent
- Reduces I/Os
 - Is it the same “where” clause?

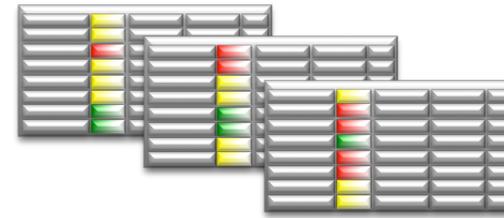

Select * from Table where B<2

Exadata software

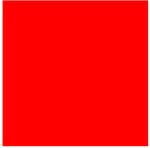

Hybrid Columnar Compression

11gR2

- Data **stored by columns** and then compressed
- **Query Mode** for DW
 - Optimized for speed
 - **10X** Compression ratio
 - Improved Scans
- **Archival Mode** to access unfrequent data
 - Optimized to reduce space
 - **15X** Compression ratio (up to 50X)

Up to
50x!

THE BEST FOR OLTP

Exadata Storage Server

Eliminates bottlenecks for Random I/O

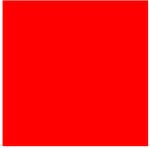

300 iops

10's of thousands iops

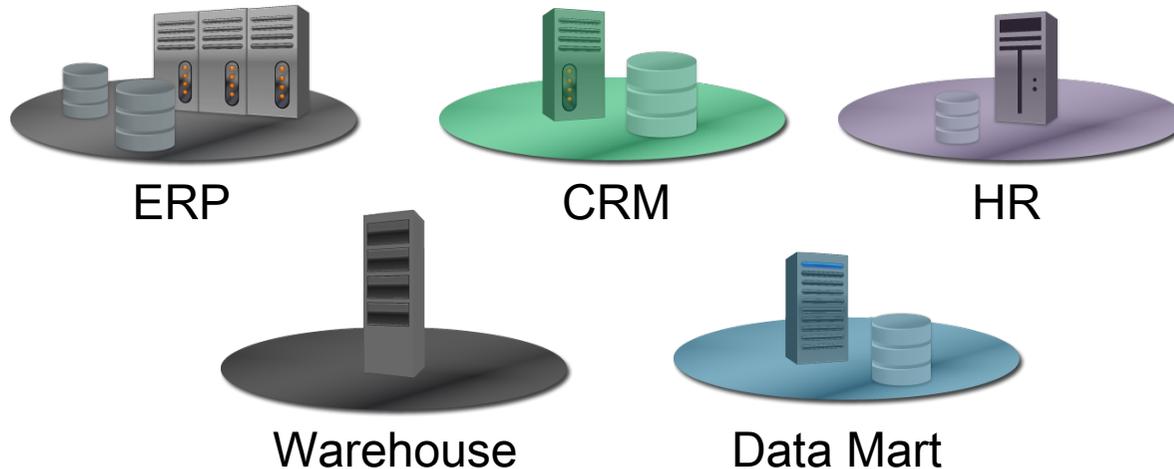

- Disks
 - Great quantity of data ↑
 - Physical limit on iops
 - Cheaper
- Memory Flash Technology
 - Hosts less data
 - 10 of thousands iops ↑
 - + expensive
- Ideal Solution
 - Only hot data on flash memory ↑
 - Transparent
 - Flash Cards
 - High bandwidth
 - Low latency
 - Avoids disk controller limitations

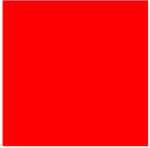

THE BEST FOR CONSOLIDATION

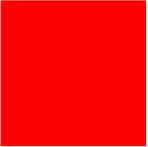

DDBB Consolidation

- Consolidate on the Database Machine
 - High Performance for all Applications
 - Low Cost HW for all Applications
 - Predictable Response time on a shared environment
 - Centralized management
 - Complete, Integrated, Open

CONCLUSION

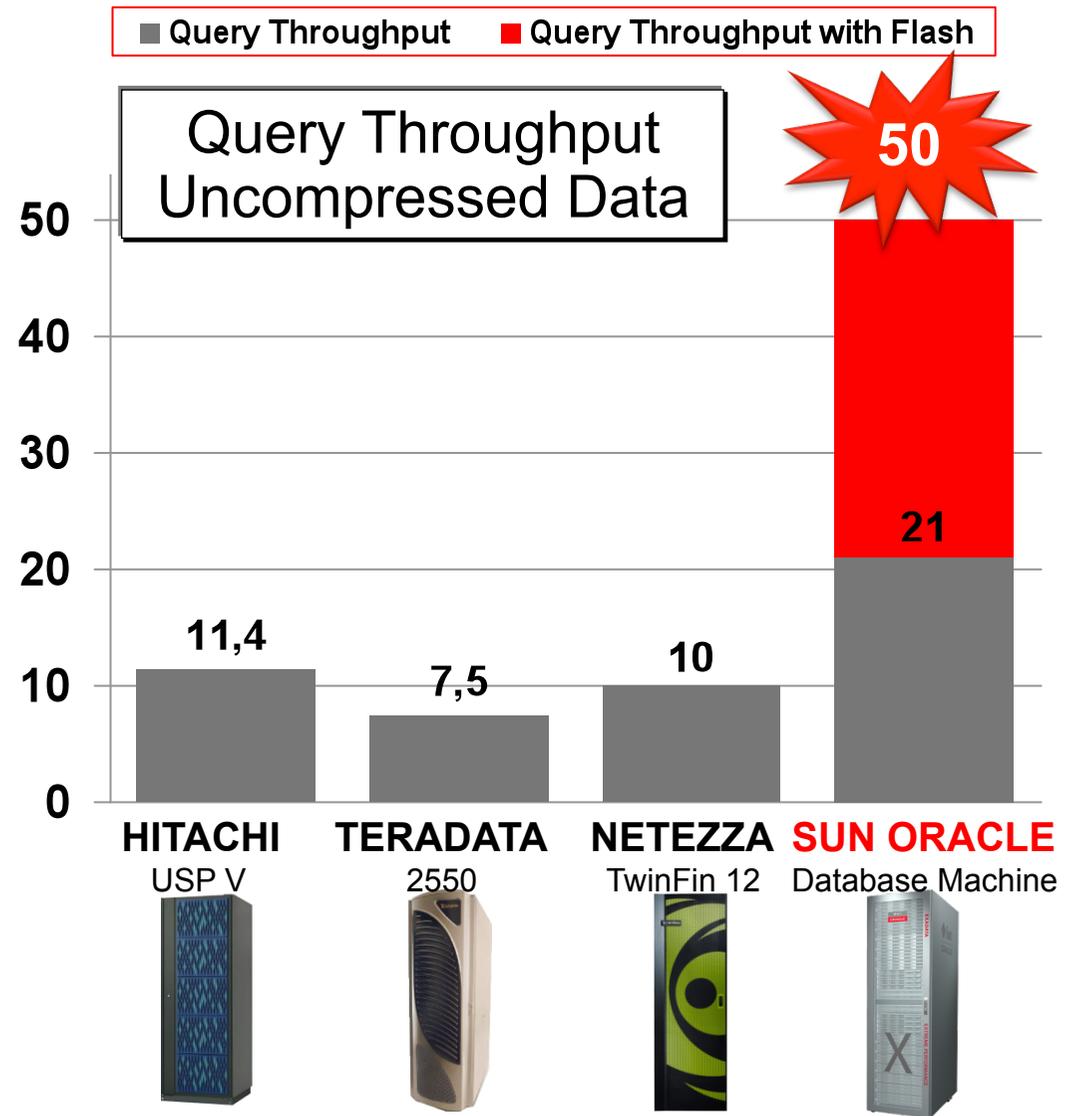

Sun Oracle Database Machine Focuses on Optimizing Mixed Workloads

- *“Consider this platform as a consolidation strategy for multiple TP applications and for improving performance by consolidating TP and DW on a single RAC system”.*
- *“Nevertheless, it’s prebuilt, tested and configured appliances can speed up deployment and will enable users to receive service from a single source.*

Gartner, 23-Sep-09

Flash Performance

- Flash storage more than doubles scan throughput
 - **50 GB/sec**
- When combined with Exadata hybrid columnar compression
 - **500 GB/sec**
- Full benefits of Flash enabled by Exadata storage software and high-bandwidth Infiniband network

Lower Costs vs **Conventional Hardware**

Database Machine

\$1,150,000

- Better Performance
 - 6x** Less Cost
 - 3x** Less Power
 - 5x** Less Space

High End SMP

High End Storage Array

\$7,700,000

Exadata Customers

“A query that used to take **24 hours** now runs in **less than 30 minutes**. The Oracle Database Machine beats competing solutions on **bandwidth, load rate, disk capacity, and transparency.**”

Christian Maar, CIO

“**Every query was faster** on Exadata compared to our current systems. The smallest performance improvement was **10x** and the biggest one was an incredible **72x.**”

Simeon Dimitrov, Enterprise Resources Manager

“Call Data Record queries that used to run for **over 30 minutes** now complete in **under 1 minute.** **That's extreme performance.**”

Grant Salmon, CEO, LGR Telecommunications

Storage & Price/Performance Comparison

	 SUN ORACLE Database Machine		 TERADATA 2550	 NETEZZA Twinfin 12
	SAS Disks	SATA Disks		
Total Disk Storage	100 TB	336 TB	42 TB	96 TB
User Data Capacity	140 TB @ 10x compression	500 TB @ 10x compression	12.6 TB @ 1.43x compression	72 TB @ 2.25 compression
System Price	\$1,150,000 H/W \$1,680,000 SW*		\$819,000	\$1,480,000
Price per User TB	\$20,000	\$5,700	\$65,000	\$20,000
Price per GB/sec of query thruput	\$55,000		\$110,000	\$150,000
